

**SIMULATE
YOUR
FUTURE**

**Be transported into
your future career**

#SIMULATEYOURFUTURE

With our mobile simulation unit we can immerse Year 9 and 10 students into real life scenarios where they interact with their future careers.

Students will get the chance to:

experience a journey through A&E

get behind the scenes of the hip hop duo, *Cold Callers*

be immersed in gaming development

The simulation unit can change at the touch of a button, providing challenging and fun scenarios for your pupils to experience potential careers in healthcare, media and computing.

The immersive experience is teamed with an engaging classroom session. This session will give students the chance to explore future careers, and allow students to reflect on themselves.

Simulate Your Future will be available in your area from September 2019 and is aimed primarily at Year 9 and Year 10 pupils.

HEALTHCARE

Follow a patient's journey as it happens from accident to A&E, theatre, recovery and on the ward. You will be transported into the real world of first responders, A&E staff and the operating theatre, and learn about careers in these areas.

MEDIA

Get a backstage pass and be immersed in a live music performance by the group *Cold Callers*. See how the roles of the collective work together to create a collaborative sound.

GAMING

Discover how gaming works from inside the game! From Tetris to 3D modelling and animation, coding and storytelling, this scenario culminates in a spectacular finale that puts you in the middle of a battlefield scene.
